🍏 iPhone & iPad (iOS)

1

Open the booking link in Safari

Your barber will send you a link — tap it to open. Make sure it opens in **Safari**, not another browser, for the best experience.

2

Tap the Share button

Look for the **↑ Share** icon at the bottom centre of Safari. It looks like a box with an arrow pointing upward.

3

Tap "Add to Home Screen"

Scroll down the Share sheet until you see **Add to Home Screen**. Tap it. You can edit the name if you wish.

4

Tap "Add" to confirm

Tap **Add** in the top-right corner. The booking app icon will appear on your home screen instantly.

Once saved, the app opens full-screen without the Safari browser bar — it feels just like a real app. You can also use **Chrome on iPhone** and tap the **: menu** → **Add to Home Screen**.

FOR CLIENTS

Android Instructions

On Android, Chrome will often show a **"Save to Phone"** banner automatically at the bottom of the page. You can also add it manually:

Android (Chrome & other browsers)

1

Open the booking link

Tap the link your barber sent you. It will open in your default browser (usually Chrome). You may see a **Save to Phone** banner — if so, just tap it!

2

Tap the ⋮ menu

In Chrome, tap the  three-dot menu in the top-right corner of your browser. In Samsung Internet, look for the  menu.

3

Tap "Add to Home Screen"

Select **Add to Home Screen** or **Install App** from the menu. Either option works — you may see one or both.

4

Tap "Add" to confirm

A prompt will appear — tap **Add** to place the icon on your home screen. Done! Your barber's booking app is now one tap away.
